IINO Kaiun Kaisha, Ltd.

### **Delivery of VLCC “YOHO” for the Japanese Oil Company**

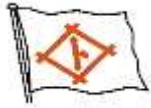

IINO Kaiun Kaisha, Ltd. (IINO), today reported the delivery of ”YOHO (洋邦)”, very large crude oil carrier (VLCC) at Nantong COSCO KHI Ship Engineering Co., Ltd. (NACKS) on 20th January, 2021. The ship is to be chartered for the Japanese oil company and joined in our fleetlist as fifth VLCC.

YOHO is our 5th ship equipped with SOx scrubber, including semi-duct system with contra fins, rudder bulb system with fins and a low-friction antifouling hull coating to improve propulsion performance, as well as an electronically controlled main engine designed to reduce fuel consumption. The sister ship of YOHO, which was delivered in September 2020, has reduced its environmental impact, with CO2 emissions decreasing by less than 20% compared to the company’s VLCCs delivered in the 2000s, and YOHO is expected to achieve the similar reduction in CO2 emissions. IINO group has set a long-term goal in mid-term management plan to reduce greenhouse gas emissions per operating ton by 40% by 2030 (compared to 2008), and will contribute to the realization of a sustainable society through ships equipped with environmental friendly technologies.

In addition, the ship is equipped with a system that automatically transmits various data recorded by the voyage data recorder and engine monitoring device to the ship management company at a higher frequency, enabling the ship management company to accurately grasp the ship's operational status. Through DX (digital transformation), IINO will ensure safety by providing support from the ship management company according to the operational status.

IINO has engaged in crude oil transportation for approximately 100 years since 1929. IINO Marine Service Co., Ltd is in charge of ship management, who have many experience and highly skilled ability in tanker management. IINO will contribute to the stable supply of crude oil that underpins industry and the daily lives of people.
